Position: Tools & Materials GSI

ENV DES 9: embARC Summer Design Academy

Instructor: Kim Suczynski-Smith

Program Dates: July 5 – July 29, 2022

embARC is an intensive four week summer design and planning course for rising high school juniors and seniors. The program allows students to explore the fields of environmental design and experience the culture of a college-level design/planning studio.

The Dean's Office is seeking a GSI to assist in executing the Tools & Materials Workshop. Students will learn about the building process, tools, and materials through Tiny House construction. They will be taught how to represent and decipher details, think critically about how materials come together, and ultimately design their own house.

All qualified applicants who are being considered for the position must successfully complete a background check. The GSI position compensation will include one week of curriculum development with the instructor prior to the start of the program.

Training and preparation dates will be determined prior to the end of the spring semester. GSI will commit to the four week program from July 5 - July 29, 2022.

How to apply: Submit your application to https://deptapps.coe.berkeley.edu/ase/ced/apply and upload a cover letter, CV and portfolio.
