OVERVIEW
embARC is an intensive four-week (July 5-July 29, 2022) summer design and planning course for high school students. The program allows students to explore the fields of environmental design and city planning while experiencing the culture of the design/planning studio.

This position assists the Academic Lead in leading/teaching the Architecture & Urban Design Studio. Instruction in freehand sketching, drafting, model-building, digital representation and sustainable building practices will teach students how to think and communicate two and three-dimensional design ideas. The studio will culminate in a final design review, where students will exhibit, present and discuss their work with CED faculty, graduate students and alumni.

SCHEDULE
Monday –Friday: Help with instruction in studio; monitor and assist students after class hours in studio

Additional obligations include:
- office hours one evening per week
- attending Field Trip
- participating in a portfolio workshop
- attending the graduation ceremony

RESPONSIBILITIES
1. Assist with room preparation, program planning, communication, announcements and any other logistical issues that may arise.
2. Assist with the instruction of course materials and assignments within the studio.
3. Assist with tracking the students’ progress within the course.

Qualifications:
- Strong interpersonal and communication skills.
- Ability to work with diverse groups in a professional manner.
- Leadership experience as a mentor, teacher or camp instructor.
- Strong experience in design representation and studio courses.
- Experience drafting and sketching by hand.
- Senior or recently graduated student majoring in Architecture.

To Apply:
